Subject: FW: Comparison of EPA and Draft FS SMA approaches

Kristine –

The following action item was discussed in our May 22 FS technical meeting and captured in last Friday's action items list:

“1. LWG will calculate acreage differences between the two SMA approaches (EPA vs draft FS) including a breakdown by cause (each RAL difference), the map artifacts changes, and the buried contamination areas.”

Per Action Item 1, LWG calculated acreage differences between the two SMA approaches (EPA vs draft FS) as shown in the attached table (pdf and Excel versions attached). We did not include buried contamination areas in the analysis in order to keep the comparison simple. We are still working on a more detailed table that breaks out the different causes for additional areas and we hope to have this done this week.

We can discuss this more on Thursday.

Please let me know if you have questions.

Carl
